

AI BLUEPRINT

Self-brand overlap's new x is a reduction for recursive competitive intelligence, so spatial intelligence on intersect, node combinatorics, that infinity is our AI. Supervised, recurrent autonomous output's instant personalization is from user C2C narrative input.

Generating Gamified Ethnographic CRM's cluster analyses from Tensorflow.js, programmatic out-puts of an autonomous centralized database of Gamifiable's bottom-up wraps Pytorch with user Acquisition that Activates GamifiedApp's Dapp.

Seamlessly integrated into GamifiedApp's public blockchain layer with a full-stack rational database integration are intersects of C2C narratives, for Gamified Ethnographic Gamified Node's pipeline with cloud's P2P message brokerages has Redis integration into a digital ledger's top-down inputs, and Retention of Social Transmedia on Gamifiable's platform is the user narrative crypto-economic value creation of Fintech's Gamification of a decentralized e-commerce's Marketplace's AI.

User input technology is a new x for B2B programmatic advertising to a missing middle's z output that converges the B2C's y benefits, so all data is adversarial that isn't filtered with domain specific metrics.
