Game Concept Statement

Galactic battles between StarShooters and SpaceWarriors become hyper-opportunities for the production of Shiyàn Meishu in warp speed that converge with the Eight Immortals that nest twelve Chinese Zodiac Art-Houses within Nine Bubble Universes in the [Heavenly Palace](#).

Concept

Taikonauts pilot Space, Length, Width, and Height into eight play-spaces, and progressing by way of the Eight Immortals with their Hyperreal Story Machine to converge cache metacognitive hierarchies between the StarShooters and SpaceWarriors, their Holographic, Multiverse Bubble Universes are controlled by an Autocratic Super Intelligence.

StarShooters mine asteroids. Converting carbon into water and endowed with the Dragon King, they seed Bubble Universes into their green Habitable Zones and Space Colony eco-system economies that are devised of the magical Qilin's currency Shiyàn with Time.

1. Mine Asteroids.
2. Seed Bubble Universes.
3. Build Space Colonies in Habitable Zones.
4. Raise Starshooter army against SpaceWarriors.

1. OriBall races to asteroid against the Trajector versus GOAP with SpaceJunk obstacles: navigational, speed, deflect, collect and merge.
2. Balance progression to green.

Game Purpose

StarShooters and SpaceWarriors are a diametric Emergence that creates a Super Intelligent AI for control of their Holographic, Multiverse, Bubble Universes. A Taikonaut trains their copy of a copy with a Hyperreal Story Machine within a Machine (Holographic, Multiverse Bubble Universe(s)).

An Ancient Animal Fable drives StarShooters' Galactic Battles against the SpaceWarriors by nesting Chinese Zodiac Arthouses within Nine Bubble Universes. With a Hyperreal Story Machine, StarShooters converge with Shiyen Meishu by traversing [eight playspaces](#) that converge with the [Eight Immortals](#) in the [Heavenly Palace](#) to be endowed as a [Dragon King](#).
